

## Lunch and Learn Presentation Suggestions

### 1. RCA Speakers Bureau

The Recycling Council of Alberta maintains a list of volunteer speakers across the province. Groups wanting to learn about waste reduction and recycling can contact the RCA at 403.843.6563 or [info@recycle.ab.ca](mailto:info@recycle.ab.ca) who will get them in touch with a local speaker to provide a presentation on these topics.

The RCA presentation provides a lot of generic environmental, waste reduction and recycling information, although sessions can be tailored for a specific focus.

### 2. Host a movie screening

Here are some good movies that can be used for a public/staff screening:

- The Story of Stuff by Annie Leonard
- Garbage, the Revolution by Andrew Nisker
- Chimerical by Andrew Nisker
- The Clean Bin Project by Jen Rustemeyer and Grant Baldwin

### 3. Local Presentations

Municipal staff or local experts can be invited to make presentations. They need not be directly involved in the municipal waste and recycling department, but may have interesting "Green" presentations (i.e. is an expert home composter, does vermicomposting, master composter, master gardener)
